

DOUBLE ARTICULATED DISC PRE-PRUNER PF-40.14-D

- Specially designed for pre-pruning in super-intensive olive plantations or similar.
- Electro-hydraulically controlled movements.
- Built on reinforced bilateral mast, allowing high visibility of the work area.
- Hydraulic assembly coupled to the driveshaft of the tractor to power the cutting process.
- 14 Ø 400 mm. discs.
- Cutting length: 2300 mm.
- Maximum height of cut:
 - o Horizontal: 3260 mm.
 - o Vertical: 5160 mm.
- Minimum height of cut:
 - o Horizontal: 720 mm.
 - o Vertical: 290 mm.
- Maximum width of cut:
 - o Horizontal: 5800 mm.
 - o Vertical: 2800 mm.
- Minimum width of cut:
 - o Horizontal: 4680 mm.
 - o Vertical: 1660 mm.
- Independent hydraulic positioning of cuts.
- Variety of movements.
- Adaptable to the front of the tractor.
